Enthusiastic and highly motivated Frontend Developer with a strong foundation in web development technologies and a keen eye for design. Proficient in HTML, CSS, JavaScript, and modern frameworks such as React. Passionate about creating responsive and user-friendly web applications. Eager to contribute fresh ideas and skills in a dynamic development team while continuously learning and adapting to new technologies.

Experience

Web Developer Intern @Neelavanth software solution

July 2022

- Internship provides hands-on experience in both technical and soft skills such as teamwork, communication and time management.
- During my internship, I developed a movie App. Applied leveraging technologies like HTML, CSS, Javascript.

Projects

Movie App

2023

- Developed a responsive web application for searching and displaying movie information using HTML, CSS, and JavaScript.
- Designed an intuitive and user-friendly interface with a search bar and a visually appealing movie display grid.

Recipe Generation based on Food Image

- Developed an innovative machine learning model to generate personalized recipes for food enthusiasts.
- Scraped and processed large datasets of recipes from various online sources to build a comprehensive training dataset
